SUMMARY

Frontend developer with **9 years** of commercial experience in **React**, **TypeScript** and **Vue.js**. Over the last 4 years, built complex B2B products (ERP, CRM SaaS): delivered frontend subsystems from requirements to release and introduced automated testing. Working remotely since 2020.

EXPERIENCE

Frontend Developer | AltSolution · Kyiv, Ukraine (remote) · 09.2022 – 10.2026

Web development studio: B2B SaaS, ERP, e-commerce. Two long-term B2B products, plus 11 Laravel projects.

Manufacturing ERP for a furniture producer — React 18, TypeScript, Zustand, AG Grid

Orders, bills of materials, warehouse, pallets, truck planning, shop-floor terminals with barcode scanners. One of the core developers in a team of five; my area: price lists, data grids and testing.

- Built and maintained the **price list subsystem** end to end (4 pages, ~26 components): price editor, validation, customer assignment, change log, markups.
- Developed and maintained **AG Grid Enterprise** data grids across ~40 screens: pagination, scroll restoration after reload, real-time updates.
- Introduced **automated testing** from scratch, including tool choice: ~500 unit tests (Vitest, React Testing Library), business logic coverage from 0% to ~80% — integer-cent amounts, ISO weeks, DST transitions, scanner hooks.
- Built ~990 **E2E tests in Playwright** running on dev, staging and locally, kept stable with data-testid selectors, shared authentication, **WebSocket**-aware waits and 8 parallel workers. Result: regressions are caught before release, with less manual checking and fewer post-release bugs.
- **Architecture and code review:** set up the app's React contexts; reviewed teammates' code for architecture rules and optimization, helped new developers onboard.

CRM / workflow SaaS platform — Vue.js 3, Vuex, JavaScript

CRM with workflows, a built-in email client and calendar for B2B clients. Scale: 133 routes, ~600 components. Worked on it 09.2022 – 08.2025, then on the ERP and other client projects.

- Evolved the product **UI kit** (125 components, used in 400+ files) and global design tokens (~390 variables).
- Main author of the **calendar** integration (Nylas) and email connectivity.
- Performance: cut **Kanban board** load time for a large client (hundreds of cards) from ~1 min to ~20 s (measured in DevTools) by loading cards in batches; removed filter freezes that started at just ~20 items by adding infinite scroll; made contact card dropdowns ~3× faster.
- Found and fixed a **race condition** that could make the UI show data from two different records at once.

Laravel projects

- Frontend in **11 Laravel projects**: a B2B portal built from scratch in 3 weeks (MVP), a market research platform, online stores, brand websites.

Products (Laravel): links.me — guest-post marketplace · buy.1guygadget.com — gadget buyback service · accu-chek.com.ua — Accu-Chek (Roche) brand website · r1tv.lv — online-school website (en / lv / uk)

Frontend Developer | VIS-A-VIS · Kyiv, Ukraine (remote) · 06.2020 – 08.2022

- Built the Vodafone Ukraine careers portal (**career.vodafone.ua**) from scratch: from markup to integrations.
- Contributed to **Vodafone Ukraine**'s main website and payment service, as well as the websites of **Raiffeisen Bank** and Oberig medical laboratory.
- Landing pages, corporate websites and online stores for agency clients, including **Vue.js** projects.
- Civil Voices Museum, an interactive online museum — custom JS and **Canvas** animations.

Projects: career.vodafone.ua (built from scratch) · vodafone.ua · raiffeisen.ua · oberig.ua

Interactive: civilvoicesmuseum.org/expositions/cloud

Frontend Developer | Horoshop, ZORELIT, Irene Bukur, freelance · Kyiv, Ukraine · 2017 – 04.2020

- Horoshop (12.2019 – 04.2020): refactoring and new features on a large e-commerce platform.
- ZORELIT (until 12.2019): **20+ websites** from scratch (landing pages, online stores, corporate sites) — markup, JS / jQuery animations, WordPress; interactive projects Horizon Park, IQ Construction, Expoplaza.
- Irene Bukur (2018): promotional landing pages and company website improvements. Freelance (2017–2018): responsive websites for small businesses.

Projects: horoshop.ua · horizon-park.com.ua · iqconstruction.com.ua · expoplaza.kiev.ua · vidimost.com · irenebukur.com

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Vue.js 3 and 2 (Composition API), Redux, Zustand, Vuex, React Router, Next.js, Nuxt (SSR), HTML5, CSS3

UI & data: AG Grid Enterprise, MUI (Material UI), PrimeReact, dnd-kit, ECharts, Chart.js, pdf.js, SheetJS

Styling & design: SCSS / Sass, CSS Modules, Tailwind CSS, responsive design, animations (custom JS, Canvas, SVG), design system / UI kit, accessibility (ARIA, keyboard navigation), Figma

Testing: Vitest, React Testing Library, Playwright; unit and end-to-end (E2E) testing, mocking, flaky test stabilization

Integrations: REST APIs (axios), WebSocket (Laravel Echo, Pusher), Nylas (email and calendar), i18n

Backend (secondary): Node.js, TypeScript, Fastify, Zod (API contracts), PostgreSQL, Redis, WebSocket; PHP 8, Laravel (controllers, routing, Blade, Twig, Livewire), MySQL, Docker

Tools & process: Git, GitLab CI (CI/CD), Vite, Webpack (lazy loading, code splitting), ESLint, Prettier, Sentry, Jira, Agile / Scrum, code review

EDUCATION

GoIT — Frontend Development course, 2017–2018

LANGUAGES

Ukrainian — native · Russian — fluent · English — B1 (technical documentation, written communication)
